Custom printing: up to 39 characters on three lines and sequential numbering up to 7 digits

Logos are available by request

The Plastic/Metal Padlock is a high quality, cost-efficient plastic padlock seal featuring a galvanised or stainless steel wire, for high tampering resistance. It is suitable in particular for key management, airlines, hatches, and tote boxes. It is also available with a clear body showing the locking mechanism inside – this increases the possibility to tamper without detection.
