

UNI412 Security Seals

The **UNI412 Security Seal** is a strong polypropylene pull-through seal with 40KgF pull-apart strength. The UNI412 seal is produced with an internal **stainless-steel insert**, ultrasonically welded inside the locking chamber for increased **tamper-resistance** and security.

Available in three lengths, with/without tear-off facility for removal by hand. Available **pre-numbered** from stock or customised with **bespoke requirements**.

Applications

Sealing of cash-in-transit bags, mail/postal bags, fuel valves, freight containers, vehicle doors

Available Colours

White and yellow available from UK stocks. Wide range of colours on request. (MOQ may apply)

Customisation Options

Organisation logo, bespoke text/markings, sequential numbering/barcoding and QR codes. Full artwork design.
