

Specification Sheet Plastic Meter Seals (PM10)

The **PM10 Plastic Meter Seal** is an alternative to traditional lead seals used in the meter industry. Manufactured from polypropylene, they are more environmentally friendly and sealed in the same way – by way of sealing pliers crimping the disc, securely closing the slot and fixing wire.

Seals are held in UK stocks for quick despatch – four different colours available as standard.

Applications

Gas, Water & Electric meters, Drums, Trailers and Cages

Size

10mm x 5mm (2.2mm Hole Diameter)
