

Specification Sheet SK1 Plug Seals

The SK1 plug security seal suits most types of tote boxes and ALC's (attached lid containers). The seal can be removed by hand easily. The plug seal is available in plain, sequentially numbered or paired (duplicate sequential numbering) options. We can also customise with your own organisation details, for a higher level of security, if required.

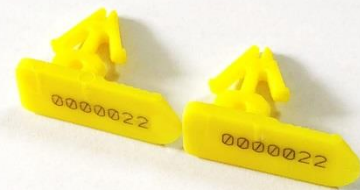

The seal is available in white or yellow colours from UK stocks – in plain and sequentially numbered options. Alternatively we can supply you with other colours (MOQ may apply).
