

## Specification Sheet InspectaTag (UVTAG-IT)

InspectaTags are **rubberised one-piece inspection tags**, available in a range of colours and available plain or with **custom-printing**. InspectaTags are well-suited as test and inspection tags in the lifting industry, ensuring the effective identification of **lifting gear, safety nets, harnesses, eyebolts** and other safety-critical equipment, requiring regular six or twelve-monthly inspections, aiding in your organisation's compliance with **LOLER, PUWER** or **Working at Height** regulations. The product's rubberised TPU material means that it is **shatter-resistant**, and rugged enough for most industrial applications.

### Material

TPU Thermoplastic polyurethane material (laser-printed)

### Applications

Safety and lifting inspection tagging, for LOLER / PUWER compliance

### Product Size Guide

Overall length 220mm long (flag size: 70x60mm)

### Features

Tail can be used in either end of flag to achieve desired tagging solution. Rubberised thermoplastic material ensures suitability for rugged and shatter-resistant lifting applications, and laser-print is resistant to exposure to chemicals, solvents and extreme temperatures.

### Available Colours

Black, Yellow, Red, Lime Green, Light Blue, White, Orange, Lilac, Pink, Brown, Dark Green, Royal Blue, Purple, Grey, Blue, Green (16 colours)
