

## Product Specification

## StrapSecure (UVSTRAP)

### Description

The StrapSecure Pallet security seal is used to seal pallets & large cartons by protecting the pallet strapping commonly used to secure cargo onto pallets or within its cardboard packaging. Each StrapSecure consists of an aluminium cross-plate & Flexigrip cable seal with a paired security barcode/ number, to seal the intersection of pallet banding placed around each side of a pallet or carton.

### Applications

Pallet and carton security, customs movements

### Stock Option

Supplied in set of 1 duplicate cross-plate and matching Flexigrip 100S

### Instructions

(1) Punch a hole through intersection of pallet strapping; (2) place cross-plate face down underneath strapping, (3) fold arms and face of cross-plate over and around strapping; (4) line up the hole in strapping with cross-plate aperture; (5) seal cable through the opening and tighten.
