

Meter and Wire Security Seals

UNI110 Twister Seal

The Twister Seal is an easily applied seal for all types of meters. A clear body houses a colour insert with a one way rotating locking mechanism. Once sealed, the locking mechanism is completely encased, meaning tampering is extremely difficult - any tamper attempts are clear from viewing the locking insert through the transparent body.

Technical Specifications

Material: Polycarbonate

Tensile Strength / Temperature Tolerance: 40kgF / -40°C - +120°C

Dimensions: *see technical drawing below*

Customisation Options: Text, numbering, barcoding

Applications: Many types of meter including gas, water, electricity, taxi and telephone, many types of valves

Available Colours:

Industries

| | | | | | | |
